

PGY2 Infectious Diseases Pharmacy Residency

Based in Nashville, Tennessee, HCA Healthcare is **one of the nation's leading providers of healthcare** services. HCA Healthcare is made up of locally managed facilities that include >180 hospitals and approximately 1,800 sites of care, including surgery centers, freestanding ERs, urgent care centers and physician clinics, in 20 states and the United Kingdom.

Program Description and Benefits

The **PGY2 in Infectious Diseases (ID)** builds upon clinical knowledge and leadership skills gained in a PGY1 pharmacy residency. Graduates of this residency program will gain experience across the continuum of care, including corporate antimicrobial stewardship initiatives, division-based facility coordination, acute care experience, education of healthcare providers and students, and collaboration with those in microbiology, infection prevention, and leadership. This experience in stewardship, leadership, and direct patient care allows the resident to gain a broad understanding of ID practice. The residency is conducted at multiple sites in the division to expose the resident to facilities of varying sizes and patient populations. Additionally, the resident gets experience leading a stewardship team and completing ID-related projects at the facility where their clinical staffing experience is conducted.

In addition to a competitive salary, residents also enjoy **additional benefits**:

- Medical, dental, and vision insurance available through the University of Tennessee
- Travel allowance for participation in professional meetings
- Free parking
- Access to corporate gym/workout facility

Application Requirements

Utilize PhORCAS system to submit the following information by **December 31st**:

- Letter of intent
- Three letters of recommendation
- Curriculum vitae (CV)
- Official school transcripts

After Residency

This program will prepare graduates for a clinical specialist or faculty position in an ID-related field.

PGY2 Program Purpose: PGY2 pharmacy residency programs build on Doctor of Pharmacy (Pharm.D.) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in specialized areas of practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care or other advanced practice settings. Residents who successfully complete an accredited PGY2 pharmacy residency are prepared for advanced patient care, academic, or other specialized positions, along with board certification, if available.

Requirements for Completion of PGY2 Infectious Diseases Pharmacy Residency

Orientation and Licensure

Obtain TN licensure within 90 days of start date
Present a copy of PGY1 program certificate within 7 days of start date
Complete all orientation requirements (Healthstream and clinical practice site competencies)

Goals and Objectives

ACHR 85% of required goals and objectives and at least SP on all other goals and objectives
ACHR 100% of goals and objectives considered essential to the practice of infectious diseases pharmacy
Complete clinical practice experience every 3rd weekend and assigned holidays
Complete evaluations within 7 days of due date in compliance with ASHP standards
Adhere to duty hours policy
Fulfill minimum of 53 weeks of work including holidays and approved absences

Research

Present research project at ASHP Midyear Clinical Meeting
Present research project at MidSouth Pharmacy Residency Conference (or acceptable alternative as determined by RPD)
Complete research manuscript that is ready for publication
Complete Authorization for Authorship form attached to manuscript with advisor and RPD's signature
Close IRB submission, if project not to continue

Presentations

Present an ACPE-accredited CE program or another educational program approved by RPD

Recruiting

Participate in recruiting and interview activities at ASHP Midyear Meeting, showcases, and on-site or virtual interviews
